

September 2008

Update to the expanded IIN Range and all Discover Network IIN Ranges

The following are the expanded Discover Network IIN (BIN) Ranges that are required for transaction routing and detailed in Release 8.2 of the Discover Network Acquirer Operating Regulations and Related Documents. Please note the highlighted IIN Range which has been expanded for Release 8.2:

601100 - 601109	352800 - 358999	622126 - 622925	644000 - 649999	650000 - 659999
601120 - 601149			
601174 - 601174	<i>Check with your</i>		<i>Newly expanded</i>	
601177 - 601179	<i>Acquirer, Acquirer</i>		<i>IIN Range for</i>	
601186 - 601199	<i>Processor or Merchant</i>		<i>Release 8.2;</i>	
	<i>Processor to</i>		<i>previously</i>	
	<i>confirm migration</i>		<i>644000-644999</i>	
	<i>of JCB transactions</i>			

For each of your POS applications, make sure that the IIN Ranges are active and that each IIN Range is updated in its entirety. Acquirers and Processing Partners are ready to support the newly expanded IIN Range and all Discover Network IIN Ranges.

Please note, if your POS application can support 6011* or 601100-601199, the five unique IIN Ranges identified under 6011* do not need to be added to your POS applications, as long as your Processing Partner can route the transactions appropriately. Please confirm the non-Discover Network IIN Ranges that will be routed by your Processing Partner are as follows:

601150-601173
601175-601176
601180-601185
